

# LOCAL SUSTAINABILITY STRATEGIES (ELoS)

MR Partidário, BR Augusto, RC Gomes

## 1. PURPOSE

- Policy and management instruments for sustainable development;
- Cyclic processes or planning and action, that emphasize strategic management of planning processes rather than the production of a plan.

## 2. METHODOLOGY

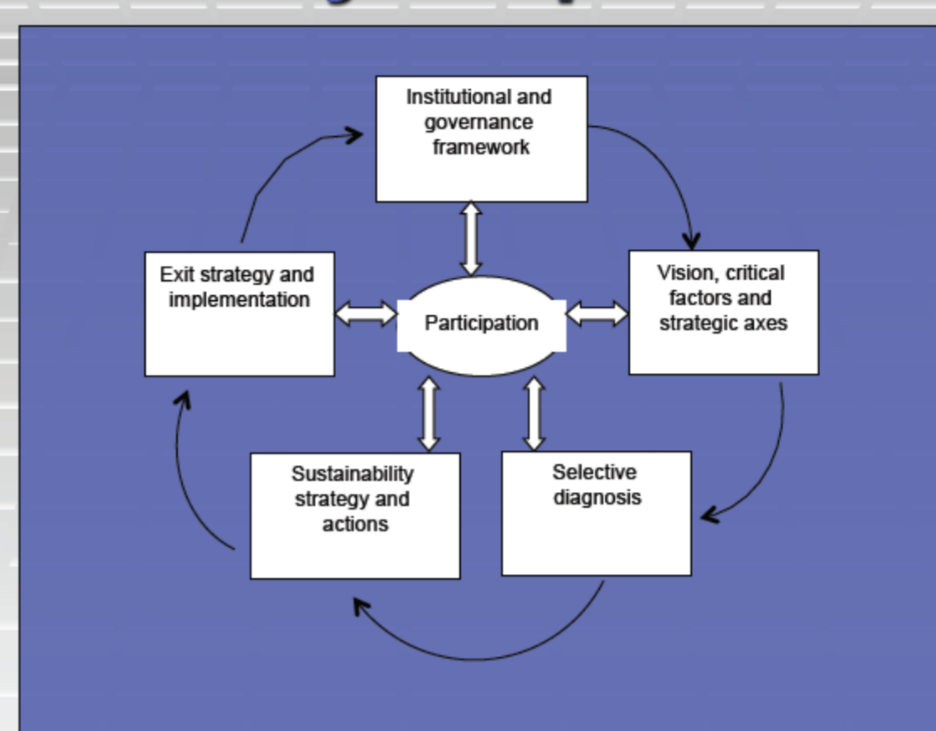

## 3. CASE STUDY: LOULÉ MUNICIPALITY

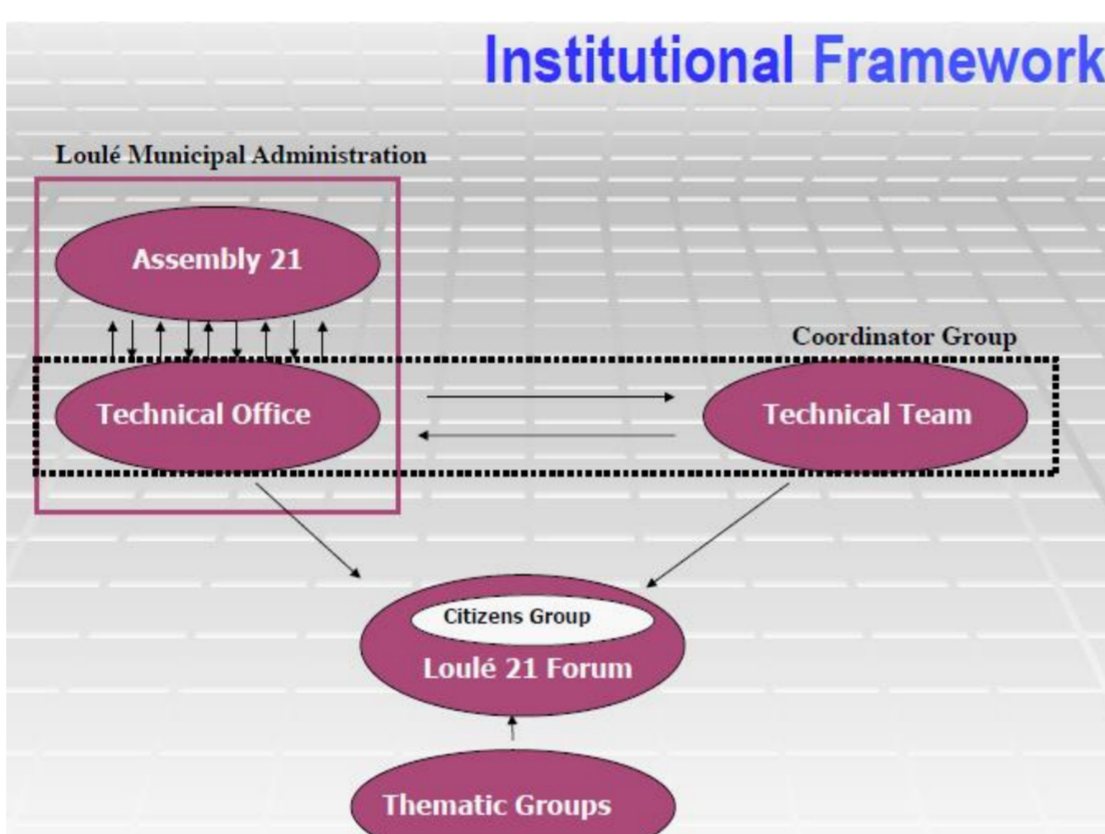

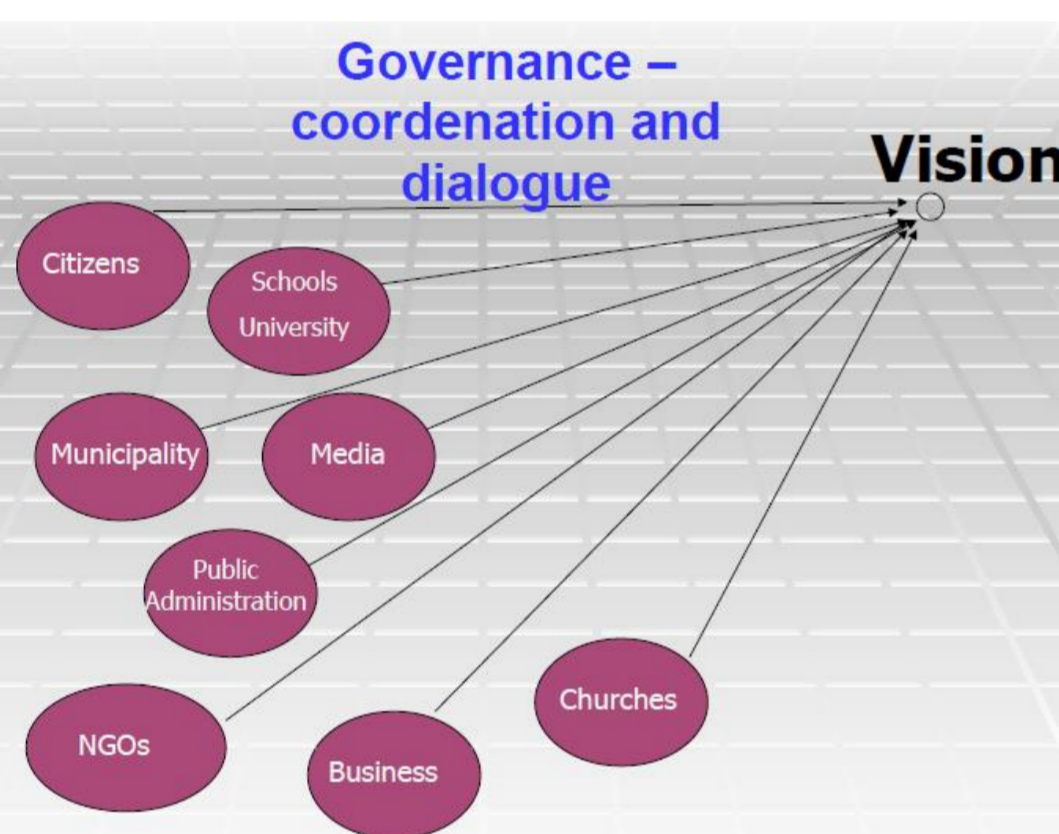

To back-up the review of the Loulé Master Plan and the integration of sustainability issues into the planning process.

### ELoS Cyclic processes

### ELoS set the framework for spatial planning process and sectoral decisions

### Multi-Stakeholder Process - More than 5000 people directly and indirectly involved

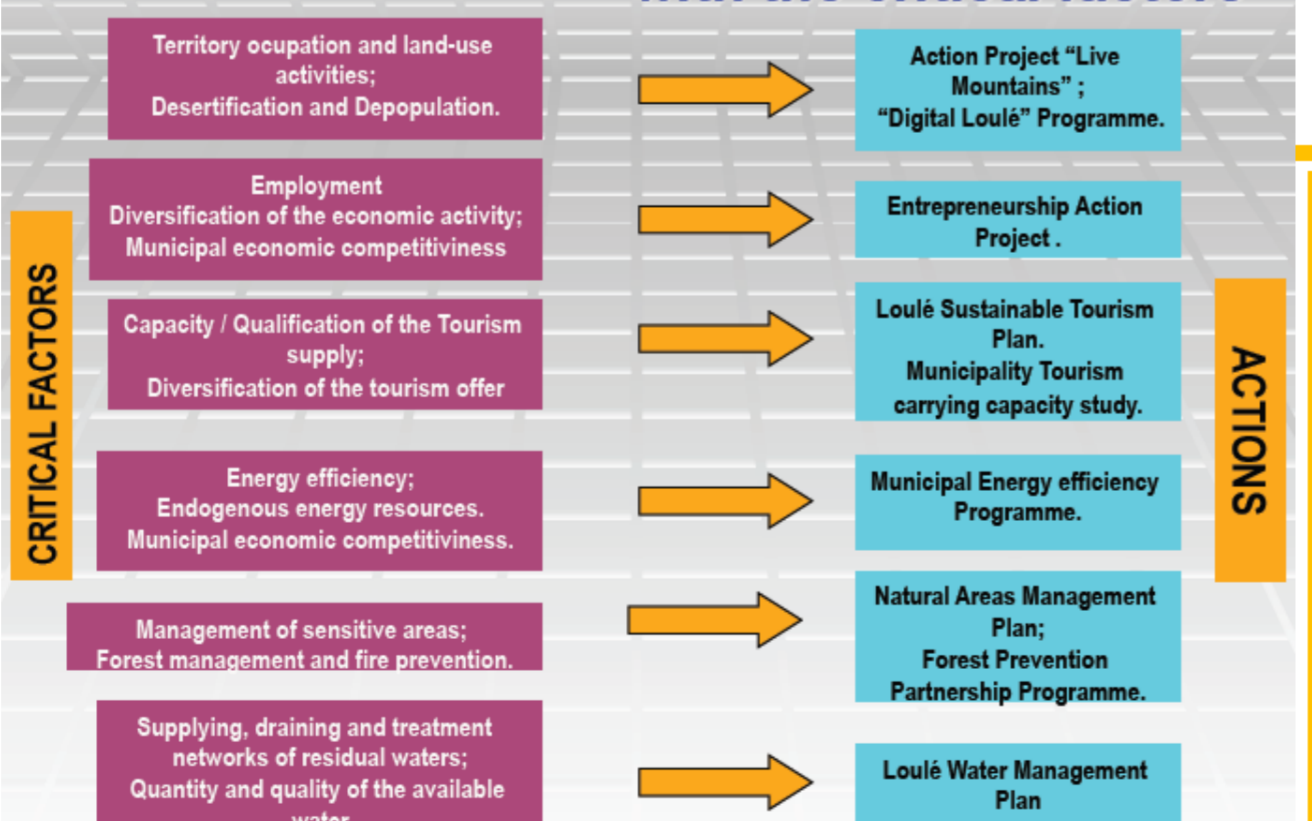

- 4 sessions of the Forum
- Population Survey
- 26 interviews
- 2 newsletters to general public
- 7 thematic workshops
- One high level meeting with the Municipal Assembly
- One meeting with the business sector
- Website

**Strategy for Action:** 50 actions identified, organized in 20 Action Projects for the six strategic axes

### Strategic Drivers

Human Development
Accessibility and Mobility
Territorial Dynamics
Sustainable Natural Resources Management
Diversification of the Economic Activities
Governance and Institutional Capacity

### Actions at a strategic level strongly linked with the critical factors

### Exit strategy:

- Advisory Council SSL;
- Institutional adaptation in the municipal organizational structure;
- Stakeholders network to promote inter-sectoral actions;
- Monitoring programme and indicators;
- Three years review time;
- Development of specific studies;
- Integration with the master plan;
- Local Agenda 21.

**Project outcomes:** new dynamics in the community, exit strategy and priority actions
