

INSTRUCTIONS TO INSTALL “DECISION TOOLS” (@Risk included) AND RUN IT WITH VPN CONNECTION

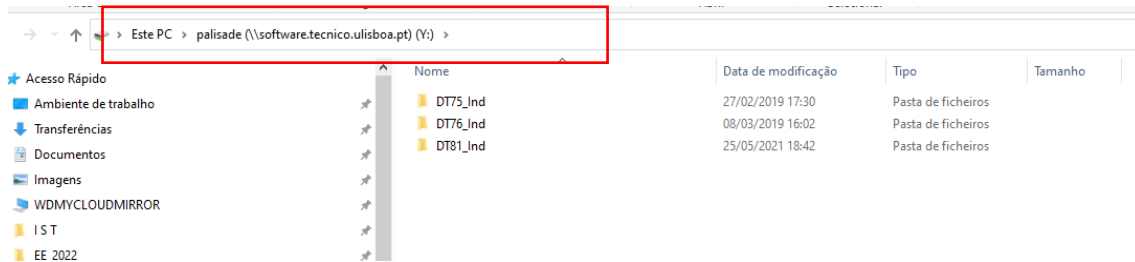

1. Connect with IST VPN, using Fenix ID
<https://si.tecnico.ulisboa.pt/servicos/redes-e-conetividade/vpn/configuracao-da-vpn-em-windows-10/>
2. Map network drive (right click over C: drive). Choose “login with other account” (to avoid Windows login)

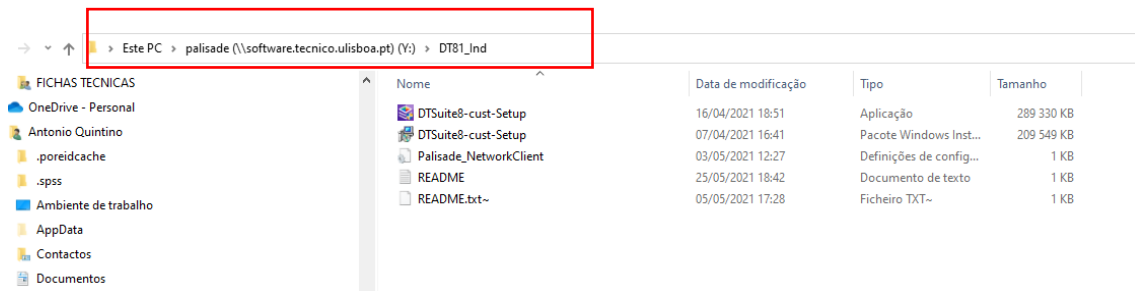

3. the user is ist***** (without @tecnico.ulisboa.pt) and the Fenix password

4. See the mapped drive

5. Choose the DT81_Ind and execute the Setup *.exe file to install the software in your Windows PC (no Mac version is available)

6. To use the Decision Tools (and the @Risk more specifically) you need to have the VPN on.

Important: only 20 students can use at the same time this software. If access is denied, wait that some other user log-off
