# PEGE Mode 2 - Final REPORT

Report should be about **5 pages, maximum 6**. The structure should be an **Abstract** (Introduction, Body of your work, … at your choice) and a **Conclusion**

References should follow a norm, and you should always use the same norm during your work. For example, in the text you insert (Abrantes and Figueiredo, 2015), at the end in the references section you explain Abrantes, R., Figueiredo, J., 2015, Resource management process framework for dynamic NPD portfolios, International Journal of Project Management 33, 1274–1288.

**Abstract**

It is a necessarily short text, 150 – 200 words, that clarifies the **goal** of your work, **methods** eventually used to construct your work and key **conclusions**. It should state **what** the author achieved, **how** he worked to achieve that, and **results** obtained.

**Conclusion**

Here you should clarify your assumptions, the decisions taken, and **results obtained**. It is a good practice to address the impact of your discoveries. Finally, you should refer what you have learned with your work and eventually point for possible future work.

**List of possible references from the most important to the less important:**
- Paper in a good journal, Web of Science or Scopus indexed (high impact factor)
- Paper in another journal
- Conference paper
- Book, or book chapter
- Web article (try to avoid)

**FINAL RTEPORT SHOULD BE DELIVERED TILL JULY 8, 2021**
