

# NAVCAD Installation guide

## 1. Uninstall previous versions

Go to uninstall apps, and uninstall any other Navcad versions you might have in your pc

Check the following folders for any hydrocomp or navcad files

C: Program files

C: Program files(x86)

C: ProgramData>BAT

## 2. Install NavCad software

In the folder there are two .exe files

First execute **NavCadCMClientSetup.exe** and follow all the steps

Then execute **NavCad2018.4.Setup.exe**

Insert the password: **HNC2018EKP**

Follow the installation steps to the end

## 3. Insert NavCad license

Start the program and select the last option: **start with a Network**

On the white box write: **192.168.1.54:11923**

Wait a few seconds and the program should start
