

MEEC - ASInt
Laboratory 8
13/14 November 2018

Continue the last laboratories to add the following functionalities to the web application:

- 1 – each book should now have a counter representing the number of likes
- 2 – implement a REST POST method (for instance API/Books/<book id>/like) that add a new like to the bookSite
- 3 – change the book information page to show the number of likes
- 4 – add a button to the book information page to add a new like
- 5 – implement a REST PUT method that allows to change the information of a bookSite
- 6 – Provide a form in the book information page that allows to change the book information
